DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a method of maintaining neighbor list, classified in class 455, subclass 437-439.
 - II. Claims 15-17, drawn to a radio communication system, classified in class 455, subclass 403.
 - III. Claim 18, drawn to a base station controller, classified in class 455, subclass 456.5.
 - IV. Claim 19, drawn to a program control, classified in class 455, subclass 418.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, II, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such as method of maintaining neighbor list, invention II has separate utility such as a radio communication system, invention III has separate utility such as a base station controller, invention I has separate utility such as a program control. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
